## Who should attend?

All workshops and courses are designed for people of all ages and levels of experience. Whether you are a novice, an experienced healer, a practitioner with your own practice, or whether you simply have a passion to acquire more knowledge for self-development, the courses are structured to help you to empower your life, provide clarity and insights into life purpose, techniques of self healing and healing others and to **'take your vibration to a higher level'** to facilitate personal growth and spiritual reconnection.

## What will I learn?

The crystal healing course covers both theory and practical application of crystals for healing and provides you with an understanding of how they interact with the body to promote healing and vibrational transformation. Crystals and Reiki access a certain vibrational frequency through the power of intent and focus of the mind. These frequencies are then resonated through our electromagnetic field (the aura), meridians, and the major energy centres in the body, known as chakras, to stimulate healing, promote insight, correct imbalances and release blockages.

Whether you choose to learn Reiki, Crystal Healing or combine them both together, they will each give you the skills needed to establish a healing practice, incorporate them with other modalities, and guide you on a journey of self discovery and a more healthy, fulfilling and balanced life.

## Metaphysics

We consider metaphysics to be a science, the most basic reason being that thought affects matter, as many scientists have proven with laboratory observations. Many people have also observed this phenomena in their own lives who suddenly recover from illness and disease simply by adjusting attitudes or thought forms about the self, others, or the world in general.

Metaphysics was something that was long ago taught in spiritual mystery schools only to those who had proven themselves worthy through long term observation by a master teacher We are spiritual beings have a human experience and we are here on the earth plane to experience all aspects of life for the evolution of the soul. Our purpose is to have mastery over, transcend, and understand the physical world and how to affect it, even while living in it as a human being. This is a science, not a phenomenon.

Natural laws of the universe exist, whether we are aware of them or not, and they are in operation all the time. Therefore, consciously learning how to use the law of cause and effect makes this practice not so magic anymore and it becomes quite available to anyone who takes the time to learn how to use this natural law of the universe by adjusting one's consciousness and therefore affecting reality.

When we learn how to work with universal laws of consciousness and the laws of nature, using the mind and emotions to effect change in the physical world, we can aspire to a purposeful and fulfilling life in alignment with our authentic self.

Mind power of the subconscious mind, with focused mind power attention, can be harnessed for healing. Harnessing the powers of the unconscious mind is the secret to healing..

## Usui Reiki Healing Levels I & II

Reiki is an amazingly simple technique to learn. The ability to use Reiki is not taught in the usual sense, but is transferred to the student during a Reiki class. This ability is passed on during an 'attunement' given by a Reiki master which opens the crown, heart and palm chakras in a unique way and allows the student to tap into an unlimited supply of 'life force energy' to improve one's health, or the health of others, and enhance the quality of life.
